

Ark-Gard ENP plugs for ENR receptacles and ENC connectors

Cl. I, Div. 1 & 2, Groups B, C, D
Cl. II, Div. 1 & 2, Groups F, G
Cl. III
NEMA 3, 7BCD, 9FG, 12

Explosionproof
Dust-ignitionproof
Raintight
Wet Locations

2P

Applications:

Ark-Gard® ENP plugs are used:

- With portable electrical equipment, such as compressors, tools, lighting systems and similar devices
- In areas made hazardous by the presence of flammable vapors and gases or combustible dusts
- Wherever portable electrical equipment is likely to be transferred from hazardous to non-hazardous areas
- In damp and corrosive areas
- When power requirements do not exceed 20 amperes
- Where general purpose application is required

Features:

- Captive set screw design is now standard on all ENP plugs
- Design assures ease of installation and reduces likelihood of losing critical components in the field
- Insulator and contact components are now a single piece assembly
- ENP plugs can be used in non-hazardous areas with standard U-ground NEMA/EEMAC configuration 5 and 6 receptacles, eliminating the need for two separately equipped portable units of the same type; the ENR receptacle will not accept standard NEMA/EEMAC configuration plugs
- ENP plug handle body is designed with an internal cord strain relief mechanism and a cable sealing grommet which will accept various cable diameters
- Field assembly is accomplished with standard tools
- Ark-Gard 2 receptacle incorporates three spring-loaded slide keys that prevent the receptacle face plate from being rotated until the ENP plug is fully inserted into the receptacle. To make the connection, the ENP plug is fully inserted, and the receptacle face moved inward by pushing the plug forward. The plug is then rotated, closing the circuit. As rotation begins, the plug becomes locked in the receptacle and cannot be accidentally disengaged. In making or breaking the circuit, any resulting electrical arc is confined in the factory sealed chamber.

Certifications and compliances:

NEC:

- Class I, Divisions 1 & 2, Groups B, C, D
- Class II, Divisions 1 & 2, Groups F, G
- Class III

ANSI/UL standard:

- UL1010

NEMA/EEMAC:

- NEMA/EEMAC 3, 7BCD, 9FG

CEC:

- Class I, Divisions 1 & 2, Groups B, C, D
- Class II, Divisions 1 & 2, Group G
- Class III

Standard materials:

- Plug body – die cast copper-free aluminum
- Interior – nylon 100
- Contacts – brass
- Plug bushing – neoprene

Ordering information:

Rating	NEMA configuration	Cat. #
15A, 125V		ENP5151
15A, 250V		ENP6152
20A, 125V		ENP5201
20A, 250V		ENP6202

Standard finishes:

- Copper-free aluminum – aluminum acrylic paint
- Brass – natural

Electrical ratings:

- Plugs – 15 and 20 amperes; 125 VAC and 250 VAC, 50-400 Hz

Grounding:

- NEC Article 501 and CEC Section 18 require that metal frames or exposed non-current-carrying metal parts of portable devices used in hazardous locations be grounded through an extra conductor in the portable cord
- ENR receptacles and ENP plugs are provided with an extra grounding pole

CAUTION: To reduce the risk of ignition of hazardous atmospheres, do not use plugs or receptacles in Class II, Group F locations that contain electrically conductive dusts.

Dimensions (in inches):

Premier and value series

Ark-Gard premier series:

- The premier line of ENR receptacles (M4) come equipped with exclusive features that increase the life of the product, reduce maintenance costs and eliminate the need to purchase costly replacement parts. There is no other product offering on the market today that comes equipped with time saving saddle clamp terminals or the added safety of a lockout/tagout hole. The premier ENR receptacle series is the ideal solution for applications where increased safety and reliability are critical.

Ark-Gard value series:

- The value line of ENR receptacles is the ideal solution for rugged and industrial NEMA configured applications up to 20 amperes. Like the premier line, this product comes equipped with built-in safety features that reject standard NEMA configuration plugs that could cause an arc in hazardous areas.

FEATURES AND BENEFITS - premier solution (M4)

Gasketed screw cap cover design:

- Offers superior protection from harsh environments for increased product life
- Eliminates the need to purchase a separate environmental cover for added protection

Complies with OSHA lockout/tagout requirements:

- Lockout/tagout hole in cover gives users the ability to lock the cover closed while not in use

Spring-loaded sliding key offers increased safety:

- Rejects standard NEMA/EEMAC configuration plugs that could cause an arc in a hazardous area
- Also prevents the receptacle face plate from being rotated until the ENP plug is fully inserted

Protected hinge:

- Cap design provides 360° of protection around cover hinge to reduce damage from dirt and corrosion

Saddle clamp terminals:

- Reduce installation and maintenance costs – easy to wire, time saving terminals

Integral bushings:

- Taper tapped hubs protect wire installation during wire pulling

FEATURES AND BENEFITS - traditional value solution

- To make connection, simply insert the ENP plug and rotate to close the circuit
- Built-in features cause the ENP plug to become locked in the receptacle and cannot be accidentally disengaged while in use

- Top hinged cover design with 45° downward angle provides protection in damp, wet and dirty locations

- Molded-in contact design provides for superior interior contact reliability
- Incorporates three spring-loaded slide keys that prevent the receptacle face plate from being rotated until the ENP plug is fully inserted into the receptacle

Ark-Gard ENR premier series dead front interlocked circuit breaking receptacles

Applications:

Ark-Gard ENR receptacles and ENP plugs are used:

- With portable electrical equipment, such as compressors, tools, lighting systems and similar devices
- In areas made hazardous by the presence of flammable vapors and gases or combustible dusts
- Wherever portable electrical equipment is likely to be transferred from hazardous to non-hazardous areas
- In damp and corrosive areas
- When power requirements do not exceed 20 amperes
- Where general purpose application is required

Features:

- Ark-Gard 2 receptacle incorporates three spring-loaded slide keys that prevent the receptacle face plate from being rotated until the ENP plug is fully inserted into the receptacle. To make the connection, the ENP plug is fully inserted, and the receptacle face moved inward by pushing the plug forward. The plug is then rotated, closing the circuit. As rotation begins, the plug becomes locked in the receptacle and cannot be accidentally disengaged. In making or breaking the circuit, any resulting electrical arc is confined in the factory sealed chamber.
- Factory sealed chamber encloses the potential arcing components between two explosionproof threaded joints; these threads are specially coated to guarantee freedom of movement, which ensures on-off action; no additional seals are required
- One-piece molded gasket seals cover plate and ENP plug when plug is inserted, providing full environmental protection at the receptacle face
- Top hinged cover design with 45° downward angle provides superior protection in damp, wet and dirty locations
- Field assembly is accomplished with standard tools
- Use standard EDS back boxes

Certifications and compliances:

Applications:

Ark-Gard ENC connectors:

- Make it safe and easy to bring power wherever it is needed
- Provide versatility for making cordsets for connecting portable devices in both hazardous and non-hazardous locations

Hazardous ENC connectors are used:

Standard maintenance or plant turnarounds to provide power connections for:

- Portable hand lamps for visual inspections
- Portable light fixtures for general illumination
- Portable hand tools such as saws or grinders

Standard operation to provide a means of quick disconnect to move or disassemble equipment, such as:

- Motor generator units
- Portable control rooms
- Pumps and motors

Common applications include:

- Refineries
- Chemical plants
- LNG facilities
- Wastewater treatment facilities
- Drilling and exploration

Certifications and compliances:

- Class I, Groups B, C, D
- Class II, Group G, Coal Dust
- Class III
- NEMA 3R, Weatherproof
- NEC Article 501.140 compliance
- CSA C22.2 No. 159M

Standard materials:

- Connector bodies – high impact strength copper-free aluminum
- Insulation – fiberglass-reinforced polyester
- Contacts – receptacle blade: brass; receptacle switch: silver; plug: brass

Standard finishes:

- Aluminum – natural
- Fiberglass-reinforced polyester – red

Options:

Description

- Corro-free epoxy powder finish for added corrosion resistance

Dimensions (in inches):

FEATURES AND BENEFITS

Uni-Shell handle body:

- Provides a smooth, durable external surface that prevents the connector from getting snagged on equipment or other cables

Spring-loaded sliding key offers increased safety:

- Rejects standard NEMA/EEMAC configuration plugs that could cause an arc in a hazardous area
- Prevents the face plate from being rotated until the ENP plug is fully inserted

Increased environmental reliability with hinged locking cover:

- Provides weather protection in damp, wet and dirty locations
- Cover stays closed until connection with ENP plug is required

Plug gaskets:

- Two gaskets cover the entire range of cable diameters, reducing risk of improper assembly
- Gasket ratchets into Tri-Lock cable grip to prevent connector from turning or loosening

Improved safety with integral lockout/tagout:

- Eliminates risk of operator or contractor plugging in process equipment when conditions are unsafe

Increased safety with captive Tri-Lock design:

- Three points of contact prevent pinching of cables that could damage internal conductors or cable jacket
- Captive screws prevent critical components from getting lost during installation

Saddle clamp terminals:

- Increased safety with easy-to-terminate connection points for reliable conductor terminations

Mates with Eaton's Crouse-Hinds series frustration-free ENP plug

Snap-in internal insulator:

- Increases safety of personnel with intermediate insulator between conductors and metallic outer shell
