Champ VMV HID luminaires

50-175W

Cl. I, Div. 2, Groups A, B, C, D
Restricted Breathing Cl. I,
Div. 2 & Zone 2 (with suffix
S826)

Cl. II, Groups E, F, G
Cl. III & Simultaneous
Presence (HPS 50W, 70W)
Marine & Wet Locations
3, 3R, 4, 4X; IP56 to IP66

3L

Applications:

Champ® VMV HID luminaires are used:

- In manufacturing plants, refineries, chemical, petrochemical and other industrial process facilities, waste or sewage treatment facilities, offshore, dockside and harbor installations, and other heavy industrial applications

- In areas in which ignitable concentrations of flammable gases or vapors will be present only due to abnormal, unusual or accidental conditions

- Where combustible dusts are present

- In marine applications where water spray and corrosive atmospheres are considerations

- In elevated ambient temperatures often found in industrial applications

- In installations where moisture, dirt, dust, vibration, corrosion and rough usage are problematic

- Wherever the damaging effects of water, wind, snow, sleet, hot sun or any combination of these elements are found

Features:

- Compact, lightweight design is ideal for medium and low mounting heights

- Cast copper-free aluminum construction (less than 0.4 of 1% copper) and epoxy powder finish provide excellent resistance to corrosion

- Hinged ballast housing for ease of installation and maintenance

- Wide choice of photometric distributions; glass globes, refractors and compact refractors available for all wattage luminaires; plastic refractors (for non-hazardous applications only) for 50-100 watt luminaires

- All luminaires are designed to perform in a 40°C ambient temperature; selected luminaires are suitable for ambient temperatures up to 65°C

- Superior gasketing seals between the mounting module, housing and optical assembly for optimum performance in wet and corrosive environments

- Hubs with an integral conduit stop and bushing to help prevent damage to field wiring during installation

- Low ambient capability to -40°C

- Dome and 30° angle reflectors made of bright white Krydon material provide superior reflectivity, with twist-on feature requiring no tools or additional hardware; will not chip, peel, dent, rust or corrode

- Grounding wire for safety

- High power factor ballasts (min. P.F. 90%) and available in a variety of voltages to meet local area requirements

- Mogul base porcelain lamp socket

Certifications and compliances:

NEC/CEC:

- Class I, Division 2, Groups A, B, C, D

- Class I, Zone 2

- HPS 50W, 70W – Class II, Class III & Simultaneous Presence (Class I, Division 2 and Class II)

UL standards:

- UL844 – Hazardous (Classified) Locations

- UL1598 – Luminaires

- UL1598A – Marine Locations

CSA standard:

- C22.2 No. 137

IEC standard:

- 60079-15

Standard materials:

- Ballast housings and mountings – copper-free aluminum (less than 0.4 of 1%)

- Exterior hardware – stainless steel

- Reflectors (dome and angle) – Krydon fiberglass-reinforced polyester

- Globes – heat- and impact-resistant internally fluted glass

- Refractors – glass (50-175W); plastic (50-100W), for non-hazardous applications

- Guards – globe: copper-free aluminum; refractor: stainless steel

Standard finishes:

- Copper-free aluminum – epoxy powder coat

- Krydon – high reflectance white

- Stainless steel – natural

Electrical ratings:

- 120, 208, 240, 277, 347, 480, 600 volts and multi-tap (120, 208, 240 and 277 volts)

- 50-150W HPS; 70-175W MH

Options:

Description	Suffix

- Factory sealed Champs **S865**

  Class I, Division 2 & Zone 2
  Provides T3 code without conduit or cable seals
  Restricted breathing/non-sparking

- Restricted breathing construction **S826**

  Class I, Division 2 & Zone 2 suitability
  Cooler operating temperatures (T-codes)

- Terminal block **S826TB**

  Furnished with terminal block, crimp terminals and dedicated voltage ballasts (no MT, DT or TT)

- Fused – to protect ballast and capacitors against abnormal line conditions ....**S658**🅐

  Not available with MT ballast
  Not for use in Canada
  Not suitable for marine applications

- Quick-Clip – holds weight of housing when closed; no need to support luminaire while screwing the housing to the cover....**S890**

- Ballast-Gard™ starter cut-out switch – prevents starter pulsing when lamp is cycling or inoperative; prolongs ballast and ignitor life.. **BG**

  Available for use with 50-150W LX HPS only

- Instant restrike – enables a hot HPS lamp to immediately restrike after a momentary loss arc due to voltage fluctuation or power outage; has no effect on the warm-up period of cold lamps.........................**IR**

  50-150W LX HPS only

- During a "failed lamp" condition, this feature discontinues the start-up operation after 1 minute.......................................**TIR**

  50-150W LX HPS only

- Quartz auxiliary lighting – comes to full brightness immediately and remains lit until the HID lamp attains 60-70% of full illumination.. **QTZ**

  For non-hazardous locations only
  Must use R2, R3 or R5 refractors

- Refractor mount ....**RM**

  For ballast housing only
  Used with R2, R3 and R5 refractors

- Stainless steel insert – top hat with stainless steel threaded insert to attach ballast housing.................................. **S806**

- Teflon coating on globe for increased shatter protection **S808**

  Available on G24 only
  T-codes not affected

- Factory assembled with HID lamps installed for additional labor savings......**FA**

Note: BG and IR options cannot be used together. IR and QTZ options cannot be used together. S865 and S826 options cannot be used together.

Photometrics:

- Refer to www.eaton.com (under the Resources tab of each product family) for specific photometric IES files

🅐 When ordering fuses for luminaires, you must specify the operating voltage. S658 cannot be ordered with /MT in the catalog number.

[B] For G243 Type III compact refractor, change '241' at end of catalog number to '243.' Example: VMVS2A050G243.
For G245 Type V compact refractor, change '241' at end of catalog number to '245.' Example: VMVS2A050G245.

[C] For R2 glass refractor, change 'R5' at end of catalog number to 'R2.' Example: VMVS2A050R2.
For R3 glass refractor, change 'R5' at end of catalog number to 'R3.' Example: VMVS2A050R3.

1. Add voltage suffix to end of catalog number (example: VMVS2C070CP/480).

Standard voltage ballasts – 60 Hz

	NEC/UL				CEC/CSA (cUL)		
	Multi-tap	Dual-tap	120V	480V	Tri-tap	Dual-tap	120V
Voltage Suffix	/MT	/DT	/120	/480	/TT	/DT	/120

Multi-tap and dual-tap ballasts are powered for 277V.

Optional voltage ballasts – 50 or 60 Hz

	CEC/CSA (cUL) – CWI isolated ballasts				Export		
	208V CWI	240V CWI	480V CWI	600V CWI	220V 60 Hz	220V 50 Hz	240V 50 Hz
Voltage Suffix	/208 CWI	/240 CWI	/480 CWI	/600 CWI	/220	/220 50	/240 50

2. 150W HPS luminaires:
- 55V lamps standard – use suffix LX; for 100V lamps – use suffix CE
- 50W HPS luminaire is dual-tap only

3. Options: Add the required option suffixes in alphanumeric order.

The Class I, Division 2 T-codes apply to luminaires without the restricted breathing (S826) or factory sealed (S865) options. These luminaires are listed to UL844. UL844 specifies how the temperatures are measured.

The Class I, Zone 2 T-codes are for luminaires that are additionally listed to UL60079-15 that specify a different method for measuring temperatures. Since NEC 501.1 states that equipment "…for use in Class I, Zone 0, 1 or 2 locations shall be permitted in Class I, Division 2 locations…," then these luminaires are suitable for Class I, Division 2 but with cooler temperature ratings. They also have the advantage of meeting the more rigorous mechanical tests of UL844.
