板前导轨型、板后型防爆按钮、开关可选用多种不同功能的按钮操作头、开关操作头。

板前导轨型、板后型防爆信号灯元件采用LED光源，内设温度开关，有五种颜色可以选择。

Descriptions :

Ex component comprises of Ex module and operation head. The standard diameter of operation head locating in the front end of Ex component is $\phi 30\text{mm}$, which is mounted on the board of 1 up to 6mm. The explosion-proof component of board front type is mounted on the standard rail of 35mm or fixed by bolt. The explosion-proof component of board back type are connected to the pre-mounted front operation head part with a clamp. The component of board front mounting rail type and board back type are attached by the terminals. The explosion-proof component of board front mounting rail type and board back type shall be mounted in the enclosure of increased safety "e" which the protection degree is up to IP54.

The various kinds of type of explosion-proof button components and explosion-proof switch components can be combined when the different operation heads are equipped with the explosion-proof switch module of board front mounting rail type and board back type. The light source of LED is adopted to the explosion-proof signal lamp component of board front mounting rail type and board back type, in which is built-in the temperature switch and there are five colours can be selected.

板前导轨型、板后型防爆电流表的面板上设有红色可调指针，设有两倍、五倍过载功能，可分为直接和间接测量。直接测量适用于0-10A的电流范围；间接测量（接电流互感器）的电流表刻度盘可互换。

- 按钮的标识牌符号经烧结后可永久保留。
- 防爆开关模块的额定电流可达16A，机械寿命可达100万次，触点材料分为银点和银点镀金。
- 防爆信号灯元件具有高亮度、长寿命等特点，电气寿命可达10万小时以上。
- 操作头和内装防爆模块已获IECEx国际认证、ATEX欧盟认证、EAC（海关联盟CU-TR）认证。

The panel of explosion-proof ammeters of board front mounting rail type and board back type are fitted with the adjustable red pointers with the functions of two times, five times overload and can be divided into direct and indirect measure. The direct measure is suitable for the current range of 0-10A and the scales of ammeters for indirect measure (for current transformer) are interchangeable.

- The sintered signs and letters in the button remained forever.
- The rated current of explosion-proof switch module is up to 16A and its mechanical life is 1,000,000 times, The contact materials have silver and gold-plated silver points for optional.
- The features of explosion-proof signal lamp are high brightness, long life and the electric life is more than 100,000 hours.
- Obtained international certification of IECEx, ATEX European Approval, EAC(Customs Union CU-TR) Approval.
